Inkwell.ai — Errata to the printed report

Oussama Bejaoui

Page numbers refer to the printed copy. None of these corrections changes a result: each brings a sentence or a figure back in line with the tables and the code it describes. A corrected PDF is available.

Page	Printed	Correct
5, Fig. 1.2	“74 user stories”	77 user stories
5, Fig. 1.2	Role note: all 3 roles held by one person, followed by a writing note	The author holds Scrum Master and Developer; the academic supervisor is Product Owner at sprint boundaries (as in §1.2.2). The writing note is removed
7	“The administrator carries the fewest (5)”	The administrator carries 8; the cross-cutting requirements are the fewest (4)
14	AI epic 21%, marketplace 18%, E9 12%	20%, 17%, 11%, as in Table 1.4
14	A purchase records “2 or 3” Transaction rows (p. 63: “writes 3”)	Up to 3: each row is written only when its amount is above zero
15, 101	“Sprint 5 commits 85 points”; “from 16 to 85 points”	98 points, as in Tables 1.5, 4.1 and 6.6
19	“Redis also carries the notification fan-out”	Removed: notifications are pushed from memory by the API; Redis is the BullMQ broker only (Fig. 1.8)
27	US-49, US-50, US-51 are “almost a fifth” of Sprint 1	21 of 45 points: almost half
29	Article “carries … search vector”	Not shown in Fig. 2.2; the sentence now lists status, placement and visibility
44, 46, 65	Eligibility rechecked “after each aggregation” (Fig. 3.4)	A separate job every 20 minutes; writer rollups run every 15 minutes. Fig. 3.4 redrawn
77, Fig. 4.24	“792 backend tests in 51 suites”	796 tests in 52 suites, as in Table 4.4
86, 89	Diagram labels “figure 7.5”, “figure 7.4”	Figures 5.9 and 5.8
91	Sprint 9 is “the lightest load after Sprint 7”	Sprint 9 (16 points) is the lightest; Sprint 7 has 18
97	“about 1,000 embeddings a day … within one day’s quota”	The 1,202 passages were embedded ahead of the evaluation; the evaluation itself embeds only its 54 queries
101, Table 6.6	Total: 363 committed, **342** delivered; “about 38 points per sprint”	**355** delivered (97.8%): US-14 (13 points) spans Sprints 2 and 4 and is counted once. About 40 points per sprint

Layout. Four figures were printed before the figure that precedes them (3.4 before 3.3, 3.15 before 3.14, 4.4 before 4.3, 5.12 before 5.11), and some running headers named the wrong part (the acronyms, conclusion and reference pages, and “Chapter A/B” for the appendices). Both are fixed in the corrected PDF, where these figures are numbered in reading order.
